

SANDEEP UPRETI

Gen AI & Data Solutions Engineer | Azure Databricks · Python · PySpark | Healthcare AI & Analytics

sandeepupreti274@gmail.com | +91-9897118186 | linkedin.com/in/sandeep-upreti-83a2a4150 | github.com/supreti115631

PROFESSIONAL SUMMARY

Data and AI solutions engineer with 8+ years of experience building scalable cloud data platforms and, more recently, Gen AI and Agentic AI solutions on the Azure Databricks lakehouse. Strong programming foundation in Python and PySpark, with a proven track record of writing efficient code to process large datasets and data streams at speed. Backed by an Executive PG Diploma in Data Science and a Databricks Generative AI Engineer Associate certification, with hands-on delivery across healthcare analytics, large-scale data modeling, and analyzing large datasets to identify actionable patterns. Recognized for translating complex requirements into production solutions and collaborating across data engineering, analytics, and stakeholder teams.

SKILLS

- **Programming:** Python, PySpark, Spark SQL, SQL
 - **Gen AI & Machine Learning:** Generative AI, Agentic AI, Databricks AI/BI Genie, Data Science foundations (statistics, ML concepts)
 - **Big Data & Architecture:** Apache Spark, Medallion Architecture, large-scale data processing, ETL/ELT, Data Modeling, Data Warehousing, Data Integration
 - **Cloud & Data Platform:** Azure Databricks, Azure Data Factory (ADF), Azure Data Lake (ADLS), Delta Lake, Unity Catalog, Azure FinOps
 - **Analytics & Visualization:** Statistical & data analysis, Power BI, Tableau
 - **Automation & DevOps:** Databricks Workflows, Git, Databricks Git Repos, Power Automate, Control-M BMC Workload Automation
 - **Healthcare Domain:** EHR/EMR (Epic), RCM, Provider Analytics, Value-Based Care, Physician Engagement, AR/Denial Management
 - **Tools:** MS SQL Server (SSMS), AllScripts, Groupcast, Flowcast, D365, Workday, Five9
-

EXPERIENCE

Data Solution Architect / Azure Databricks Engineer

EXL Service | 2022 – Present | *Client: Duly Health – Azure Databricks Platform*

Modernization Stack: Python · PySpark · Spark SQL · Azure Databricks · ADF · Delta Lake · Unity Catalog · Azure FinOps · Epic (EHR) · D365 · Workday · Five9

- Drove Gen AI and Agentic AI initiatives on the Azure Databricks lakehouse, designing and delivering AI solutions to meet project requirements and unlock advanced analytics for healthcare decision-making.
- Architected end-to-end migration from MS SQL Server to Azure Databricks, implementing medallion architecture with Delta Lake and Unity Catalog for enterprise-grade governance and data quality.
- Built efficient, metadata-driven ETL pipelines using PySpark, Spark SQL, Azure Data Factory, and Databricks to process large datasets from Epic EHR, D365, Workday, and Five9 sources at speed.
- Engineered Power BI frameworks that analyze large datasets to surface operational efficiency insights, patient growth patterns, and geographically targeted marketing intelligence.
- Developed enterprise data models across clinical, operational, and financial healthcare domains, ensuring regulatory compliance with data privacy standards.
- Managed solution infrastructure and offshore delivery, translating complex stakeholder requirements into scalable Databricks solutions while collaborating across data engineering and analytics teams.
- Implemented data security and governance policies and target-state architecture, replacing legacy SSMS infrastructure.

Senior Data Analyst / RCM Subject Matter Expert

EXL Service | 2020 – 2022 | *Client: Optum – Revenue Cycle Management Analytics Stack:*

MS SQL Server (SSMS) · Tableau · Epic · AllScripts · Groupcast · Flowcast · Control-M BMC

- Served as RCM SME, performing analysis on large datasets and designing custom reporting data models across appointment scheduling, revenue tracking, cash management (MNCR), AR management, and denial management.
- Built and published Tableau dashboards delivering actionable insights for Optum's RCM operations and critical business decision-making.
- Optimized SQL data models and queries for performance, improving reporting reliability and reducing data processing latency.
- Implemented SQL Server data warehousing architecture and automated workloads via Control-M BMC, reducing manual intervention across pipelines.

Data Analyst – Travel Analytics

EXL Service | 2017 – 2020 | *Client: American Express GBT – Air Spend Optimization Stack: MS SQL Server (SSMS) · PowerPoint*

- Managed air spend and savings optimization for Fortune 500 accounts including Motorola, Hershey's, Hartford, and Honeywell.
 - Analyzed airline contracts and translated terms into curated datasets mapping route discounts; supported RFPs to secure optimized carrier savings.
 - Developed route volume, market share, diagnostic, and share-shift reports informing ongoing program management (OPM) and airline alliance strategy.
-

PROJECTS

Healthcare Lakehouse — Gen AI & Agentic AI Enablement (Duly Health)

Designed and delivered Gen AI and Agentic AI capabilities on the Azure Databricks Data Intelligence Platform to unlock advanced analytics for healthcare decision-making. *Python · PySpark · Azure Databricks · Delta Lake · Unity Catalog · Generative AI*

Enterprise MS SQL Server → Azure Databricks Migration (Duly Health)

Architected and executed a full platform modernization to a medallion-architecture lakehouse with Delta Lake and Unity Catalog, replacing legacy SSMS infrastructure with governed, scalable, high-throughput data processing. *Azure Databricks · ADF · Delta Lake · Unity Catalog · PySpark · Spark SQL*

EDUCATION

- **Executive PG Diploma, Data Science** — International Institute of Information Technology Bangalore (IIIT-B) | 2022 – 2023
 - **B.Tech, Electrical & Electronics Engineering** — National Institute of Technology (NIT) Uttarakhand | 2013 – 2017
-

CERTIFICATIONS

- Databricks Generative AI Engineer Associate
- Databricks Certified Data Engineer Professional
- Databricks Certified Data Engineer Associate
- Databricks Data Analyst Associate
- Databricks Solution Architect Champion

- Microsoft Certified: Azure Administrator Associate
-

ACHIEVEMENTS

- Earned 6 industry certifications spanning Generative AI, data engineering, analytics, and cloud administration (Databricks + Microsoft Azure).
- Architected and delivered a full enterprise migration from MS SQL Server to Azure Databricks, modernizing the data platform to a governed medallion lakehouse.
- Led offshore analytics and reporting delivery, bridging business and technical teams across multiple healthcare engagements.
- Managed air-spend optimization for multiple Fortune 500 accounts (Motorola, Hershey's, Hartford, Honeywell) at American Express GBT.
